

New England Centenarian Study

Study volunteers NEEDED!

Are you 100 years old or older, or do you know someone who is? Our participants receive **\$100** for completing our core study components!

Research Study Goals

We are interested in examining why people over the age of 100 are able to live so long, and in many cases, avoid Alzheimer's, cancer, and other diseases.

To enroll in our study, you must:

- be **over the age of 100** (some family members may also be eligible)
- live anywhere in the lower 48 states of the US

What is the process like?

Prospective participants contact us

We confirm eligibility and enroll

Participants share data

Data is protected

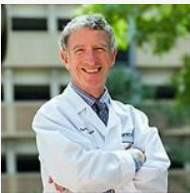

Researchers study data

Communities benefit from findings
